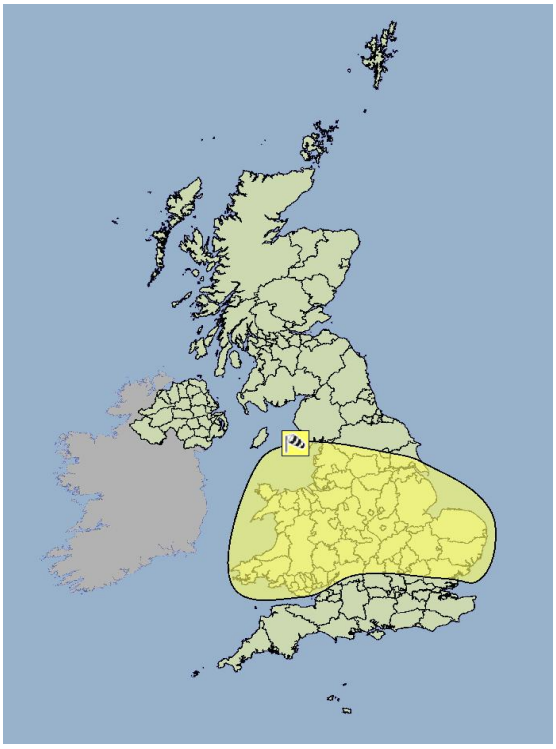
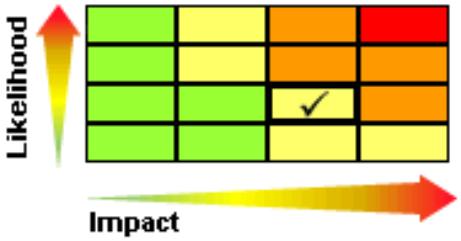
# National Severe Weather Warning Service





**Chief Forecasters Assessment**
Gusts of 50-60 mph are likely quite widely. There is some uncertainty over the peak gusts, but there is a small chance of winds reaching 70 mph in places - most likely across coastal north Wales and northwest England during the middle part of the night and then across parts of Lincolnshire and East Anglia early on Thursday morning.

The Met Office have issued a **Yellow Warning** of **Wind**

Valid from **00:05 on Thu, 18th Jan 2018** until **09:00 on Thu, 18th Jan 2018**

Strong winds will affect parts of the UK early on Thursday. The strongest winds are expected to transfer eastwards across the warning area before clearing by mid morning.

Road, rail and ferry services may be affected, with longer journey times and cancellations. There is also a possibility that some bridges may close. Power cuts may occur, with the potential to affect other services, such as mobile phone coverage. Injuries and danger to life from flying debris are possible, along with some damage to buildings.

In addition, large waves are expected to affect some western coasts with beach material being thrown onto sea fronts, coastal roads and properties.

This is an update to the warning, shrinking the yellow area and also the validity period.
